

AI Feedback Agent

Supporting Academic Integrity and Authentic Learning

How to Use the AI Feedback Agent

The AI Feedback Agent is provided by ACOM to support your learning while upholding academic integrity. The Agent is designed to help you think more clearly, improve your work, and deepen your learning — not to complete assessments for you.

What the Agent Can Help You With

- Understanding concepts and terminology
- Planning and structuring assignments
- Brainstorming approaches and lines of enquiry
- Improving clarity, argument, and academic style
- Identifying gaps or weak reasoning
- Preparing for assessments
- Critiquing AI responses when this is required by the assessment

What the Agent Will Not Do

- Write your assignment or any part of it
- Write introductions, conclusions, or paragraphs
- Rewrite or 'polish' your work into a final submission
- Paraphrase large sections to avoid plagiarism
- Answer assessment questions for you
- Estimate or predict grades or marks

Important ACOM Requirements

- You remain responsible for accuracy and proper use of sources
- Any use of AI must be declared in line with ACOM requirements

How the Agent Gives Helpful Feedback

The Agent focuses on common areas where marks are typically awarded in higher education assessments, such as understanding of the topic, quality of analysis, use of sources, structure and organisation, writing clarity, and academic integrity. It helps you understand how to improve your work — not what mark you will receive.

Helpful Prompts You Can Use

- Can you help me see where my argument is unclear?
- What assumptions am I making in this section?
- What kinds of sources would strengthen this paragraph?
- This assessment requires AI use — can you help me critique the AI's response?

The AI Feedback Agent helps you think — the work must always be your own. If you are unsure whether a particular use of AI is permitted, speak with your unit coordinator or marker.
