

PREACHING GENESIS

A GUIDE TO DIGITAL FILE SUBMISSION

1. VIDEO FILE RECORDING & SUBMISSION (If applicable)

EQUIPMENT

Video and audio are best captured with a phone. Use the rear camera rather than the lower quality front-facing (selfie) camera. Laptop/computer webcams are generally lower quality. If you have a good camera with a dedicated microphone, that's probably the only thing that will be better than your phone.

KEEP IT STEADY

If you have some sort of tripod, use that. Otherwise prop your phone up somewhere steady. Only hand-hold if there's some reason to do so (be creative!)

MAKE IT HORIZONTAL / LANDSCAPE

Mostly people will watch on a wide screen (TV, computer, sideways phone) so you'll come out really small if you hold your phone up tall and narrow.

TECHNOLOGY

Videos are large files, too big for standard email. The easiest way to send the file is to upload to the Preaching Genesis Dropbox: (<https://tinyurl.com/1xzypo56>) This can be done directly from your phone or computer.

ENVIRONMENT

Try to avoid recording in contexts of lots of background noise and with little interruption.

2. PODCAST (AUDIO) FILE RECORDING & SUBMISSION

EQUIPMENT

Recording audio can most easily (and adequately) be captured with a smart phone microphone and via an accompanying App (such as Voice Memos on iPhone). Computer microphones tend to pick up more background hum / noise. If you have access to a good external microphone that can easily be plugged into a computer this is also a good option.

TECHNOLOGY

Audio files are large, too big for standard email. The easiest way to send the file is to upload to the Preaching Genesis Dropbox: (<https://tinyurl.com/1ay2rmq7>) This can be done directly from your phone or computer.

ENVIRONMENT

Try to avoid recording in contexts of lots of background noise and with little interruption.
